

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, June 19, 2021– 0730 MDT  
National Preparedness Level 3**

**National Fire Activity:**

Initial attack activity:	Light (142 fires)
New large incidents:	9
Large fires contained:	3
Uncontained large fires: ***	30
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	8

Nationally, there are 10 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

## Southwest Area (PL 4)

New fires:	4
New large incidents:	3
Uncontained large fires:	9
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

\* **Backbone**, Coconino NF, USFS. IMT 1 (SW Team 1) mobilizing. Eleven miles west of Pine, AZ. Brush and timber. Extreme fire behavior with wind-driven runs, crowning and spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

**Telegraph**, Tonto NF, USFS. Transfer of command from IMT 1 (SW Team 2) to IMT 2 (NW Team 6) will occur today. Two miles southeast of Superior, AZ. Short grass, chaparral and brush. Moderate fire behavior with running, flanking and backing. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Pinnacle**, Coronado NF, USFS. IMT 2 (SW Team 3). Eighteen miles south of Bylas, AZ. Short grass, brush and timber. Active fire behavior with wind-driven runs, running and spotting. Residences threatened. Evacuations, area, road and trail closures in effect.

**Horton**, Apache-Sitgreaves NF, USFS. Five miles north of Hannigan, AZ. Timber and heavy slash. Active fire behavior with uphill runs, flanking and backing. Area closures in effect.

**Rincon**, Sante Fe NF, USFS. IMT 2 (SW Team 4). Twenty-five miles northwest of Las Vegas, NM. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Area and trail closures in effect.

**Slate**, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Minimal fire behavior with smoldering.

**Winchester**, Southeast District, Arizona DOF. Twenty miles northeast of Benson, AZ. Short grass, brush and chaparral. Minimal fire behavior with smoldering. Energy infrastructure threatened.

**Cemetery**, Bernalillo District, New Mexico DOF. Two miles northeast of Bosque, NM. Timber, short grass and brush. Minimal fire behavior with smoldering.

**Cornville**, Coconino NF, USFS. Two miles east of Cornville, AZ. Brush and chaparral. No new information. Last report unless new information is received.

**Johnson**, Gila NF, USFS. Previously reported incident. Twenty miles north of Silver City, NM. Timber and grass. Moderate fire behavior with flanking, backing and creeping. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

\* **Bear**, Apache-Sitgreaves NF, USFS. Thirteen miles south of Hannigan Meadows, AZ. Timber and brush. Moderate fire behavior with group torching and creeping. Last narrative report unless significant activity occurs.

\* **Moore**, Apache-Sitgreaves NF, USFS. Twelve miles west of Alma, NM. Short grass and brush. Moderate fire behavior with backing, single tree torching and creeping. Last narrative report unless significant activity occurs.

### **Great Basin Area (PL 3)**

New fires:	5
New large incidents:	1
Uncontained large fires:	7
Type 2 IMTs committed:	2

**Pack Creek**, Manti-La Sal NF, USFS. IMT 2 (GB Team 4). Fourteen miles southeast of Moab, UT. Timber and brush. Moderate fire behavior with single tree torching, backing and smoldering. Structures threatened. Evacuations, area and road closures in effect.

**Bear**, Vernal Field Office, BLM. IMT 2 (CA Team 10). IMT is also managing the Bennion Creek fire. Three miles northwest of Heber, UT. Timber, grass and brush. Minimal fire behavior with isolated torching and smoldering. Transportation and energy infrastructure threatened.

**Bennion Creek**, Manti-La Sal NF, USFS. Twenty-three miles northwest of Helper, UT. Brush, chaparral and timber. Minimal fire behavior with single tree torching and smoldering. Trail closures in effect. Reduction in acreage due to more accurate mapping.

**Sandy Valley**, Southern Nevada District, BLM. Ten miles southwest of Las Vegas, NV. Brush. Minimal fire behavior with smoldering.

**Cottonwood Valley**, Southern Nevada District, BLM. Eight miles west of Las Vegas, NV. Brush and grass. Minimal fire behavior with smoldering.

**Petrilla**, Truckee Meadows Fire Protection District. One mile south of Reno, NV. Short grass and brush. Minimal fire behavior with smoldering.

\* **Flatt**, Cedar City Field Office, BLM. Five miles northwest of Enterprise, UT. Brush. Extreme fire behavior with wind-driven runs, torching and spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** An upper-level shortwave trough will move southeast from western Canada into the Northern Rockies with the upper-level ridge building to the northwest over the West Coast from the Desert Southwest. Stronger west-northwest winds will develop across the inland Pacific Northwest, Northern Rockies, and the northern Great Basin into Wyoming ahead, along, and behind a cold front sliding to the south and east leading to elevated and critical fire weather conditions. Relative humidity will start to increase behind the front with precipitation likely during the evening and overnight along and east of the Continental Divide in northwest and central Montana. Isolated dry thunderstorms are likely across eastern the Great Basin into the Colorado Rockies and broader Four Corners region. Another round of wet thunderstorms are likely for southern and interior portions of Alaska with heavy rain from the Lower Mississippi Valley into Georgia.

## Hazard Tree Felling – Hang-Ups

*Felling Safety Category*

Felling a hung-up hazard tree is a particularly hazardous and complex task. Safely felling a hang-up requires extreme caution and expertise.

The following are some topics sawyers should review during tailgate safety discussions to address felling hang-up hazard trees:

### Size up and Evaluation:

- Cut/No Cut (walk-away). Is tree secure and does it need to come down?
- What type of hang up? In a fork, pinched between two trees, or resting on limbs?
- Vertical hang ups have increased complexities.
- Condition of all relevant trees live, dead, rot, etc. Does the hang up tree have any weak areas that could fail?
- Obscured view of top?
- If sawyer is unsure of the outcome, do not attempt to cut a leaner.

### Operational Considerations:

- Escape routes for unforeseen circumstances?
- Consider falling trees as a group.
- Consider face cuts versus slash cuts for directional control.
- Rope technique allows increased distance from danger zones.

### Alternative Mitigations:

- Blasting
- Heavy equipment/cable
- No Work Zones

Discuss any personal lessons learned with hang-up trees that you may have experienced.
